

SOUNDBEAM®

NEW
2017

Have you met SOUNDBEAM?

AWESOME

it's the
musical
instrument
everybody
can play!

Meet the all-new

Soundbeam 6 is simple to use and so easy to play using its completely new touch screen interface with quick and easy navigation of functions:

- Soundbeam 6 offers a truly multimedia experience.
- Extensive library of high-quality instrumental and sampled sounds
- Simplified record and compose functions
- Pre-loaded musical and themed setups, with **linked film** adding a visual accompaniment
- HDMI socket for large screen projection

For over 30 years we have been delivering remarkable technology which gives users the power to unlock self-expression, encourage independence and communication, and to provide that potentially life-changing experience of "I can do that!"

No surprise we have won so many awards and continue to be one of the world leaders in special needs education and therapy.

Music Teacher magazine
Best SEN Resource winner

SOUNDBEAM uses highly sensitive contact-free movement sensors, alongside tactile switches, providing an accessible interface for **up to twelve participants** – at any level of cognitive or physical ability – to play together as creative musicians.

It is a great musical instrument for special schools, day centres, care homes, for individuals of any age with learning disabilities, autism, dementia and a whole range of other conditions.

"One of the things schools have trouble with is creating 'awe and wonder' – having used Soundbeam we've certainly achieved that ...magical."

**Sam Woodward,
Forest Way School**

"Soundbeam provides teachers with a new means of developing pupils' creative imaginations across the curriculum."

**Professor Helen Coll,
University of
Central England**

"...the visual clarity of the interface makes it a joy to work with."

**Mike Roberts,
Warwickshire
Music Service**

"When it really comes together you can almost forget that you're in a wheelchair, and that is the most marvellous thing on the planet. I can forget about all the junk that I have to live with."

Chris Lees

"It's amazing to see how ingenious people are in using Soundbeam, and also how truly liberating it can be!"

**John Paul Jones,
Led Zeppelin**
